## How Cubixx Works

Cubixx Solutions increases inventory efficiency while reducing errors

- Patented RFID technology scans all Factor and specialty pharmaceutical products placed in Cubixx units
- Eliminates barcode scanning and label printing for greater efficiency
- Automatically notifies ASD Healthcare to restock or replenish Factor and specialty products
- Continuous temperature monitoring ensures product integrity 24/7/365
- Automates cycle counts to reduce time and possible human error
- Tracks dispensed products at pharmacist, tech or other provider levels
- Enables inventory monitoring from remote locations 24/7/365 through electronic/mobile devices
- Customized par levels meet provider and facility needs, including specific Factor assay range, product quantity and restock criteria
- Eliminates unnecessary revenue loss due to human error and oversight
- Routine and customized data reports for fast and easy generation of regulatory compliance reports, including product movement and temperature monitoring
- Offers transaction analytics to forecast product use over time
